

NOT BY CHANCE: CHILD CARE THAT SUPPORTS SCHOOL READINESS

FREE CLASSES

Supporting children's school readiness in child care settings takes careful planning, knowledge and attentions to each child's individual needs. This training will provide knowledge of three tools used in Minnesota's early childhood and school age care and education system:

- * The Minnesota Early Childhood Indicators of Progress that describes what young children should know and be able to do
- * The Minnesota Core Competencies which defines what providers should know and be able to do
- * The Environmental Rating Scales: A set of tools for understanding and measuring the quality of a child care or school age care

To register, please call your District CCR&R agency
